Bhubaneswar, India | B.Tech CSE, KIIT Deemed to be University | CGPA:
8.71/10

Education

KIIT Deemed to be University - Bachelor of Technology in Computer Science and Engineering CGPA: 8.71/10	2022 - 2026
Trinity International Secondary School - Class XII (National Examination Board) 84.25%	2020
Om National Academy - Class X (National Examination Board) 81.25%	2018

Technical Skills

Languages: Python, Java, JavaScript, Dart, C, SQL, HTML, CSS
Frameworks & Libraries: React.js, Node.js, Express.js, Flutter, Spring Boot, Angular, Flask, Pandas, NumPy, Scikit-learn, TensorFlow
Databases: MongoDB, MySQL
Cloud, DevOps & Security: Microsoft Azure, Azure DevOps, Azure Pipelines, GitHub Actions, Docker, AWS, Microsoft Sentinel, Microsoft Defender, KQL, CI/CD, Bicep, ARM templates
Tools & Domains: Git, Postman, Power BI, Tableau, Excel, Data Science, Machine Learning, Cybersecurity, IAM, Zero Trust, Web Development, Mobile App Development

Internship

Academy of Skill Development - Full Stack Development using MERN Stack Intern Project: CMS - Content Sphere Hub Certificate ID: ASD/FUL/KAL/CMS/75298 Completed an 8-week project-based industrial internship and implemented a full-stack CMS using React.js, Node.js, Express.js, MongoDB, JWT and REST APIs. Built reusable UI components, protected authentication routes, blog creation/editing workflows, responsive dashboard, dark mode and backend error-handling middleware.	May 2025 - Jul 2025
---	---------------------

Projects

SecureDrive - Browser-Native Secure Cloud Storage Framework React.js, TypeScript, Node.js, Express.js, MongoDB, WebCrypto API, AES-GCM, PBKDF2, SHA-256, JWT, ProVerif Developed a secure cloud storage prototype with client-side encryption, protected metadata, deduplication-aware storage, password-protected sharing, controlled retrieval and audit logging. Validated upload/download/sharing protocols using ProVerif and evaluated SecureDrive against a NoEncryption baseline across 1 MB to 500 MB file sizes; journal manuscript currently in progress.	Research Project
AI-Driven Dynamic Access Control for IAM in Zero Trust Architecture Python, TensorFlow, Scikit-learn, Isolation Forest, Variational Autoencoder, ONNX, Docker, REST API, gRPC, Azure AD Conditional Access Built a Zero Trust IAM prototype that analyzes user, device, network, geolocation, keystroke and session behaviour signals to classify access as Allow, Step-Up MFA or Deny. Generated a 50,000-row synthetic IAM dataset with 26 attributes and 1,400 users; achieved 0.91 F1-score, 97% simulated attack blocking, 92% false-positive reduction and 48 ms average decision latency.	Jun 2025

Certifications

- Microsoft Certified: Azure Fundamentals - Microsoft, Oct 2022; AZ-400: Designing and Implementing Microsoft DevOps Solutions - Exam Passed, Aug 2023.
- Full Stack Development using MERN Stack - Academy of Skill Development, Jul 2025; Data Engineering - ExcelR, 2025.
- Full Stack Development - Java Spring Boot & Angular - ExcelR, 2025; Palo Alto Networks Cybersecurity, Network Security, Cloud Security & Security Operations Fundamentals, 2025.
- IBM / Coursera Data Science Professional Coursework; Udemy Snowflake: The Complete Masterclass.

Achievements, Activities & Soft Skills

Activities: Technical Club coding sessions and peer mentoring; NSS digital literacy workshops; HackerRank 30 Days of Code Challenge; CodeChef Monthly Contest.
Soft Skills: Communication, teamwork, problem-solving, adaptability, analytical thinking, leadership, time management and quick learning. Languages Known: English, Hindi, Bhojpuri.
